

Victoria Falls: the smoke is thundering

Listed as one of the Seven Natural Wonders of the World, the "Smoke That Thunders" is looking spectacular at the moment and is luring visitors to Victoria Falls. The intensity of noise and spray is gathering momentum as the season of high water (April to July) approaches.

The forthcoming full moons - 23 March, 22 April and 21 May - will be the dates to note if wanting to witness the magical lunar rainbow, which appears the night before, the night of and the night after the full moon. The lunar rainbow is at its best, if the night is clear, when there is sufficient spray to create the moonbow effect.

Witnessing the Falls at its best can be done either from the air or walking the various trails.

There are various other activities to enjoy, especially for the adrenalin-seekers – bungee jumping, abseiling, whitewater rafting and river-boarding just to name a few.

[Africa Albida Tourism](#) offers a variety of accommodation types at Victoria Falls to suit different budgets.
