Innovation at the core: Future-proofing BCD Travel

Rennies BCD Travel's mission is to help people and companies travel smart and achieve more. This is what lies at the heart of the company's strategy to improve its agility, flexibility and responsiveness in a shifting environment. The corporate travel customer experience depends on multiple parties, airlines, travel management companies, online booking and other service and technology providers, working together to optimise delivery. When ecosystem partners don't work together to facilitate this provision, the programme suffers.

Successful distribution requires better content (that customers want), better displays (so customers can access it) and robust integration (so customers can fulfill strategic business objectives).

We focus our attention on providing choices that empower, not limit our business and our customers.

1. Advanced travel technology:

BCD Travel is at the forefront of incorporating cutting-edge technology into its services. The company leverages artificial intelligence and machine learning to provide personalised travel recommendations, real-time updates, and predictive analytics. This not only enhances the traveller experience but also helps clients make data-driven decisions for cost savings and efficiency.

2. Sustainability and responsibility:

As the world becomes increasingly aware of the importance of sustainable travel, Rennies BCD Travel has taken proactive steps to reduce its environmental footprint. The company offers a comprehensive suite of sustainable travel options, including carbon offset programmes, eco-friendly accommodation choices, and transportation alternatives that minimise environmental impact.

3. Traveller well-being:

Rennies BCD Travel places a strong emphasis on traveller well-being. In response to the changing landscape of business travel due to the pandemic, the company has implemented comprehensive health and safety protocols. These include real-time health alerts, Covid-19 testing and vaccination information, and assistance with travel restrictions and quarantine requirements.

4. Mobile solutions:

In a world that is becoming increasingly mobile-centric, the company has invested in mobile solutions to enhance the traveller experience. Their mobile app offers features like booking management, itinerary updates, and 24/7 support, ensuring travellers have the information they need at their fingertips.

5. Global reach and local expertise:

BCD Travel's global network of offices and experts provides clients with unparalleled local insights and support. Whether your company is operating in a major international hub or a remote location, the company's presence ensures you receive the best possible service and support.

Rennies BCD Travel's win at the World Travel Awards is a testament to its unwavering commitment to excellence,
