

Tea in the Park opens in Green Point

Western Cape organic compost provider, Reliance, launched their new Tea in the Park café in Green Point Park.

Tea in the Park, with Cape Town stadium and Table Mountain as its backdrop, embraces a spacious outdoor terrace where you may enjoy a relaxing afternoon tea set with your friends, or spoil yourself with a tantalising variety of sweet and savoury options. Furthermore, the menu offers a wide selection of fresh and tasty lunches, or simply a snack on the way, seven days a week.

Centred around celebrating local food, recycling, as well as culture and community, Tea in the Park is dedicated to creating a space for educating our youth on environmental impacts and concerns, as well as sustainable practices. Workshops available upon request.

In partnership with the City of Cape Town, Reliance has over the past 16 years changed the views and methodologies around of organic waste. More than 17 million cubic meters of the City's green garden and park waste has been diverted from landfills and transformed into over 1,000,000 tons of organic compost. The City's green waste is ploughed back into the beautiful surroundings of Green Point Park using Reliance Organic compost.
